PROFESSIONAL SUMMARY

Computer Science and Engineering undergraduate at Symbiosis Institute of Technology, Nagpur, with working proficiency in Python, C, Java and SQL and a solid foundation in Data Structures, Algorithms and Object-Oriented Programming. Experienced in building computer vision and deep learning projects with OpenCV, MediaPipe and CNN architectures, with exposure to AWS cloud fundamentals. Seeking a software engineering internship where I can apply these skills to production problems and learn from experienced engineers.

EDUCATION

Symbiosis Institute of Technology, Nagpur Bachelor of Technology (B.Tech), Computer Science and Engineering	Jul 2024 – May 2028 (Expected)
M. K. H. Sancheti Junior College, Nagpur Higher Secondary Certificate (Class XI–XII), Science — 83.3%	Jul 2022 – Apr 2024
R. S. Mundle English School, Nagpur Secondary School Certificate (Class X) — 92.7%	Jun 2016 – Apr 2022

TECHNICAL SKILLS

Programming Languages: Python, C, Java

Core Computer Science: Data Structures and Algorithms, Object-Oriented Programming, DBMS

Machine Learning & Vision: OpenCV, MediaPipe, NumPy, Convolutional Neural Networks, MobileNetV2, Grad-CAM

Databases & Cloud: SQL, AWS (cloud fundamentals, basic deployment)

Other: Embedded Systems, Git and GitHub

PROJECTS

Driver Drowsiness Detection System - Built a real-time system that monitors a driver through a webcam feed and raises an alert when signs of drowsiness are detected. - Used MediaPipe facial landmark detection with OpenCV video processing to track eye and mouth state across frames. - Implemented frame-wise numerical analysis in NumPy to distinguish sustained drowsiness from ordinary blinking, reducing false alerts.	<i>Python, OpenCV, MediaPipe, NumPy</i>
Tomato Leaf Disease Detection Model - Developed an image classification model that identifies common tomato leaf diseases from photographs of crop leaves. - Applied transfer learning with a MobileNetV2 backbone to achieve reliable accuracy on a lightweight architecture suited to low-resource deployment. - Integrated Grad-CAM visualisations to highlight the leaf regions driving each prediction, making the model's output interpretable to non-technical users.	<i>CNN, MobileNetV2, Grad-CAM</i>

EXPERIENCE

Web Development Intern — InternPe <i>Remote</i> - Completed a two-month structured web development internship, building responsive web applications to provided specifications. - Developed front-end interfaces with HTML, CSS and JavaScript, focusing on clean layout and cross-device compatibility. - Delivered assigned milestones on schedule and incorporated mentor feedback through iterative review cycles.	May 2026 – Jun 2026
